

Construction (Problem) Number	Construction
1	At a given point in a given line construct an angle equal to a given angle.
2	Construct a triangle given two sides and the included angle.
3	Construct a triangle given two angles and the included side.
4	Construct a triangle given the three sides
5	Construct the bisector of a given angle
6	Construct the line that bisects a given line segment and is perpendicular to it.
7	Construct the perpendicular to a given line through a given point outside the line.
8	Construct the perpendicular to a given line at a given point in the line.
9	Construct a line parallel to a given line through a given external point.
10	Divide a line segment into a given number of equal segments
11	Construct a tangent to a given circle at a given point on the circle.
12	Construct a tangent to a given circle through a given external point.
